## Fitprint®

Fitprint® is revolutionary computer technology that scans your feet through different phases of your gait.

Fitprint® identifies pressure points in your feet and assists the highly trained staff at The Athlete's Foot to recommend the most comfortable, best-fitting shoes you will ever wear.

Fitprint® is a complimentary service and is exclusive to The Athlete's Foot.

## Foot Facts:

A child's foot is constantly evolving. In the first 11 years a child's foot grows about 17 full shoe sizes and continues to grow until they are 18 years old.

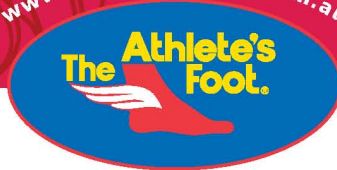

Often this growth happens in spurts which makes it tempting to buy your kids shoes a little too big.

However, this is just as bad as footwear that is too small and can result in long term damage to their feet.

It is essential to get children's feet measured properly every time new shoes are needed.

Thanks to our highly trained Fit Technicians, getting the right FIT is easy at The Athlete's Foot.

\*Gift Pack consists of shoe bag, towel and water bottle. Design of items may vary slightly from those above. \*One gift per purchase. From February 2010. While stocks last.

## Important features of Netball Shoes

- Cushioning** - when stopping suddenly to shoot or pass during play, the force applied to your feet and legs can exceed your body weight by up to 6 times. That's a lot of stress - so cushioning is one of the most critical features of a netball shoe.
- Added cushioning** - With so much pressure on your feet, adding an innersole can help to provide you with extra support and cushioning.
- Stability** - With so many stopping, starting and jarring actions, stability is critical in a good netball shoe. Look for a shoe which allows your foot to sit down inside the shoe and has a firm heel counter.
- Traction** - Netball can be played on a variety of different surfaces. A good outersole will allow you to pivot easier, provide grip and will ensure the shoe lasts longer.

# ATTACK and DEFEND with the best fitting shoes this season..

**asics.**
